Project Leader (m/f)

Key Responsibilities

- As an IT project manager, you advise our customers on the planning and implementation of large infrastructure, organization and software development projects.
 - You support our consultants in their professional development.
 - Furthermore, you carry out projects in the related areas of IT service management or project management as part of a team.
 - You build, maintain, and innovate processes and tools for our customers.
 - You prepare communication materials for multiple stakeholders.
 - You support existing customers with regard to the machCon GmbH consulting offer.
 - In addition, you will be responsible for the conceptual development of machCon GmbH's services / consulting services.
-

Your Profile

- You have completed a higher education (Uni, FH, BA) in a technical or business field or a corresponding professional training.
 - You have at least 4 years of in-depth professional experience as a project manager in large-scale IT infrastructure projects, backed up by ITIL certifications.
 - You have a methodical approach and good conceptual and analytical skills.
 - You are characterized by a high level of commitment and willingness to learn.
 - You share our values such as motivation, openness and integrity.
 - Ideally PMI certified.
 - Familiarity with regulatory framework and guidelines for pharmaceutical products.
 - Leadership skills and experience.
 - Good IT know-how and understanding of processes.
 - Fluent in English language; German language skills desired.
-

We offer

- A diversified consulting activity in an interesting and international customer environment with strategically relevant customer projects.
- The opportunity to develop further and take on responsibility.
- A professional consulting environment together with a young, highly committed team in a moderately growing company.
- Above-average opportunities for further training, a performance-related salary, and extensive additional benefits.
